

Hollywood Primary School

Autism Resource Base—Our Vision

Working together, realising potential

To us, this means we can celebrate our Autism, learn and achieve every day!

School:

To provide an accessible and adaptable education that is positive and personalised to each unique child, encompassing children's communication, social and academic skills.

Children:

To teach and develop strategies and skills to children to reduce their anxieties and raise their confidence to support them to be successful in the mainstream classroom and wider community.

Families:

For school and home to work together with the children's best interests in a mutually supportive relationship, sharing information and strategies that keep the child's needs central
